stood before the big battery of milling machines in the Grape-Nuts factories, and after inspecting both the wheat and flour said to the miller:

"That's selected wheat, and no 'patent flour' stunt, either. That wheat comes ont of the rolls as honest and unrefined as it went in. Where did you ever make flour before that retained the true mineral content of the grain?"

And the wise miller replied: "I have worked in a good many mills, and I am no youngster, but let me tell you. I never made whole wheat flour like that until I came with this company."

The truth is, white flour is wofully lacking in certain essential mineral elements which are thrown out in the milling to make flour white and pretty, and its use frequently results in impaired health and activity.

The famous pure food,

Grape-Nuts

is made of honest whole wheat and malted barley and supplies in splendid proportion all the brain and nerve-making, bone and muscle-building elements of the field grains, including their mineral elements.

Rich, nut-like flavour, ease of serving, and quick digestibility have made Grape-Nuts a house-hold word the country over.
